# Potter AVBB-R — Quick Start Guide

## Product Overview

• Potter AVBB-R is a red indoor surface back box designed for wall-mount horns, strobes and horn/strobes.

• The enclosure is constructed from high-impact plastic and provides a convenient surface-mount solution.

• The AVBB back box is intended for indoor use and supports universal mounting to a surface or most electrical boxes.

## Before Installation

• Confirm the AVBB-R is suitable for the selected indoor wall-mount notification appliance.

• Confirm the mounting surface and electrical box are suitable for the installation.

• Plan conduit or surface-raceway entry before securing the enclosure.

## Installation Steps

• Select an appropriate indoor mounting location and verify compatibility with the wall-mount notification appliance.

• Use the provided mounting hardware and appropriate knockout for conduit or surface raceway.

• Use reinforcement washers when installing conduit.

• Do not over-tighten screws, as this can damage the back box.

• Complete wiring and appliance installation in accordance with the applicable fire alarm system requirements.

## Final Check

• Verify the enclosure is securely mounted.

• Verify screws are not over-tightened.

• Confirm the notification appliance is securely attached and the fire alarm circuit is restored to normal operation after testing.
